

How to change app screen size

If you like to extend horizontal space available for the application, go to **your profile (1)**. Under **theme setting (2)** you can adjust **screen width (3)**.

The screenshot displays the application's user interface. At the top, a navigation bar includes a search bar, a star icon, a calendar icon, a mail icon, a settings icon (marked with a red circle 1), a clock showing 00:00:00, and a user profile icon labeled 'Ross Moore' (also marked with a red circle 1). Below this is a horizontal menu with tabs: Dashboard, Clients, NonClients, Opportunities, Jobs, Timesheets, Expenses, Employees, Billings, Receipts, Reports, and myPlanner. A breadcrumb trail shows the path: » jobs fee burn » dashboard panel » add timesheet » panels settings.

The main content area features a sidebar on the left with a 'Home' tab and a 'Time' tab. The 'Time' tab is active, showing a 'New Business Job' section with a 'new request' button, a 'Status: Any' filter, and a 'Name:' input field. Below this is a 'Clients' section with a 'new client' button and a 'Pelican Fitn' entry. Further down is a 'Time: Calendar' section with a 'my timesheet' button and a calendar view showing 'Sun' and 'Mon'.

The central part of the screen displays the 'My Profile - Ross Moore' settings window. This window has a 'Personal' section with a profile picture placeholder and a 'Theme' section (marked with a red circle 2). The 'Theme' section shows the 'Current Theme' as 'dark blue' (September 2011) and the 'Default Theme' as 'dark blue' (December 1990). Below these, there are four theme preview cards: 'black tie' (December 1990), 'blitzer' (December 1990), 'cupertino' (December 1990), and 'dark blue' (September 2011). A 'Screen width' slider (marked with a red circle 3) is located below the theme previews, with a 'restore default' button. At the bottom right of the settings window are 'save' and 'cancel' buttons.
