Azure AD / OKTA / Single Sign On Integrations

Recently our hardworking team completed a number of updates to all of our GainPlus applications – TaBS; Totem Leave; and Totem Payroll, to allow **Single Sign On** using Microsoft Azure Active Directory credentials and OKTA Identity Cloud.

Our integrations provide for seamless authentication using existing Microsoft passwords from Active Directory (and any changes to them) or by using centralized password management from OKTA.

Contact us if you would like further information on implementation for your GainPlus application.
