# Core functionality supported by Totem Attendance:

## Cloud Hosted

No need for special servers, no complicated software installs. Just a modern browser. Any time, anywhere!

## Manage Attendance from Mobile App

- Use one button to clock on/off
- Show accurate attendance team status with real-time updates.
- Managers can review and approve requests in a matter of seconds, with no need for training.

## Geofencing for attendance tracking

Allow your employees to check-in only from approved locations and provide freedom to check-in from any locations subject to manager approval.

## Real-Time Reporting

Gain instant access to staff check-in details with live data feeds and reporting summaries.

## Multiple check-in methods

Allow check-in from one of available options: mobile, Kiosk, finger or face scanner

## Kiosk mode

Replace finger scanner with Kiosk application to streamline collection and processing of the staff check-ins

## Work from Home

Application supports ability to check-in from home or other approved locations

## Flexi Time

Implement strict working hours or allow staff flexibility for check-in hours

## Integration with Payroll

Automatically include OT and working hours (daily employees only) on Payroll
